

Loadmaster and  
Dispatcher Harness type  
Airsafe 3100, with QAB-  
parachute.

**The Harness, Airsafe type 3100,  
was developed for the Norwegian  
Air Force. It is a development of  
the Swedish type 1100 harness.**

The Airsafe type 3100 harness can be used with  
a Quick Attachable Back Parachute. The  
parachute is connected at the front and waist.

### Special features

The harness has:

- Elasticated Rear attachment strops.
- Tandem style release handle for rear strop.
- Oxygen pockets for several different systems including PHAOS, C-130 walk-around-bottle etc.
- Integrated Hook knife and/or Rescue Knife.
- Safety feature. An accidentally deployed parachute will release rear attachment strop.
- Covered Capewell canopy releases.
- Attachment points for Quick Attachable Back Parachute. Activation handle at left shoulder. (Option, chest parachute, Aircrew CYPRES, etc)
