

Lightweight Door Gunner and Helicopter Crew Harness, Airsafe 2-1560.

The Harness, Airsafe type 2-1560, was originally developed for the Norwegian Air Force. It is a light weight and comfortable harness that is designed to be worn underneath other equipment such as a life vest or a combat vest.

The Airsafe 2-1560 is designed mainly for the needs of helicopter door gunners, snipers and hoist operators. The running attachment ring allows unrestricted movement and makes the harness easy to integrate with combat vests, ballistic vests and life jackets.

Special features

- Movable attachment at waist level.
- Parachute style Quick Release Handle.
- Compatible with most life vests, combat vests.
- Easy-to-adjust chest strap and leg straps.
- Net mesh.
- Adjustable attachment strap.
